Drinking Water Agreements

Eastham DW-17-01

This project consists of constructing a town-wide water system, the core of which is under construction as Phase 1. In this Phase 2, the town will construct the remainder of the distribution system such that every property in Town has the ability to connect to the water system. Contract 2A of this Phase will consist of installing the District H well field and approximately 19 miles of distribution system piping, extending the availability of public water to more areas of town.
